DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ichikawa et al. US 6,265,479.

3. The rejection set forth under 35 USC 103 in the paper mailed 6/18/07 is deemed proper and is herein repeated.

4. Applicants amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.

5. Applicants argue that the claimed nitrogen content of 0.12 to 0.30 is patentable over the "less than 0.10" shown in the art. This is not persuasive. 0.12 is rendered obvious from less than 0.10. One of ordinary skill understands how to have higher nitrogen contents. There remains no showing or allegation of unexpected results commensurate in scope with the claimed invention.

6. The fact that the present invention does not include the step of removing decomposed proteins is not seen to be germane to the instant patentability.
